

Flexibly secured

The steel cable lock 1850 is flexible and versatile.

With a length of six feet, the spiral cable by ABUS offers a generous range to secure your valuables. Motorcycles and bikes can easily be attached to fences and lampposts. And there's still a safe place for the helmet and other accessories. Another plus: The 1850 folds up to save space and for easy transport.

The ABUS 1850 features two loop ends connected by a separate U-lock or padlock, providing versatile security options for your valuable items. Whether used independently or as an addition to your existing U-lock, padlock, or frame lock, it offers the flexibility to secure multiple bulky objects simultaneously, safeguarding them against theft or unauthorized use.

The steel cable's synthetic coating ensures protection against paint damage and scratches during both attachment and transport, making it ideal for securing garden tools, garden furniture, surfboards, ladders, and various items around your home, yard, or workplace, effectively deterring theft.

Technologies

- High quality steel cable with two loop ends
- Synthetic coating to prevent damage to the bicycle's paintwork

Use and application

- Additional security item to secure components

-
- Multiple purpose cable for garden, house, leisure activities and work

Tips

- The Loop-Cables are a very useful complement for U-shackle, frame and padlocks
- Coil cable locks offer a compact transport size and have an extremely multifunctional and practicable length

Technical data - 1850/185
